3 <sup>rd</sup> June 2011	1.1	SRS final submission for term 102	Yasir

## 1. Introduction

This clause shall provide an overview of the purpose, objectives and the definitions used for this project. It's an abstract overview that will ease the understanding of the following parts.

### 1.1 Purpose

The purpose of this document is to present a detailed description of the Obesity Group Clinic System. It will explain the purpose and features of the system, the interfaces of the system, what the system will do, the constraints under which it must operate and how the system will react to external stimuli. This document is intended for both the stakeholders and the developers of the system and will be proposed to Dr. Mahmood Sajjad for its approval.

### 1.2 Objective

The **objectives** of The Obesity Group Clinic System (*OGCS*) are as follows -

- Developing a user-friendly system, since the Obesity Group Clinic System (*OGCS*) will replace the current complicated process of profiling the patients and monitoring their progress.
- Developing a robust and reliable system that can handle the progress of many patients.
- Developing a reusable system, that can be implemented offshore for economic purposes.
- Making the profiling of patients, suggestion of ideas and the workflow of *OGCS* as easy as possible.
- Transferring the experiment of patient-doctor relationship into a more digitized, electronic and web-based relationship.

### 1.3 Definition and abbreviations

The **definitions** that will be used along the development cycle of the project:

- *SPMP* – Software Project Management Plan
- *SRS* – Software Requirements Specification
- *SDD* – Software Design Document
- *STD* – Software Testing Documentation
- *OGC* – Obesity Group Clinic
- *OGCT* – Obesity Group Clinic Health Team
- *OGCS* – Obesity Group Clinic System
- *SAMSO* – Saudi Aramco Medical Services Organization
- *BOI* – Bank of Ideas

## 2. Product Description

### 2.1 Problem statement

<b>The problem of</b>	Currently, the <i>OGCT</i> records information on paper or uses simple tools like Microsoft Excel. The way goals are assigned to patients is entirely dependent on the <i>OGCT</i> 's decision.
<b>Affects</b>	This affects the professionalism and consistency of the <i>OGCT</i> as well as the degree of quality to which the services are provided.
<b>The impact of which is</b>	This may be one of the factors to explain the high dropout rate from the support group.
<b>A successful solution would be</b>	After implementation of this system, the <i>OGC</i> would be able to keep online records of all patients' information and history. The system will suggest goal(s) to the <i>OGCT</i> for patients. Patients will be able, as well, to interact with the system and watch their progress over time. They can choose their goals and determine whether it's suitable for them or not. This will help <i>OGCT</i> to set more realistic goals for patients, monitor them and ensure their success.

## 2.2 Project Scope

The **scope** of The Obesity Group Clinic System (*OGCS*) will be developed to manage and organize the Obesity Group Clinic (*OGC*) located in Saudi Aramco Medical Services Organization (*SAMSO*) in Dhahran. The main functionality of the system is the profiling of each patient and the organizing of goals. In addition, The Obesity Group Clinic System (*OGCS*) will provide other functionalities that will help and improve the workflow of the system. Patients will be able to interact with the system, manage their goals and report back to Obesity Group Clinic Health Team (*OGCT*). Also, *OGCT* will be able to monitor patients and getting reminded of when to monitor. The system should be deployed by December 2011 and the resources provided should accommodate the development process of the project.

## 2.3 Product Position

<b>For</b>	Hospitals with support groups for obese people
<b>Who</b>	Currently, no hospital in the Eastern Province in KSA employs the use of systems for determining most appropriate goals for Obesity health groups.
<b>The (product name)</b>	<i>OGCS</i> [Obesity Group Clinic System]
<b>That</b>	This system will help the patient and <i>OGCT</i> to make informed and appropriate decisions in selecting a goal for the patient.
<b>Unlike</b>	This system is not scheduling software because it provides more flexibility to <i>OGCT</i> to customize goals from the database for every individual patient.
<b>Our product</b>	This system will make the choosing of ideas and the communications of patients with the clinic easier and clear. Patients can register to the system, choose appropriate goals to be achieved, monitor their progress and report back to <i>OGCT</i> .

## 2.3 Purposed solution

iDhahran team has purposed to develop a Patient Management and Profiling System under the name of Obesity Group Clinic System (OGCS). The system should be able to create profiles, assign goals, keep records and present progress reports for each patient. The system will present a more elegant and efficient way of handling the clinic's processes and improve the quality measures in the criteria of time and monitoring. The system will also handle the follow-up reminders to monitor the patient. It will also be more flexible in regards of assigning goals, suggesting goals and in general uses.

### 3. Project capabilities

<b>Capability ID</b>	<b>1</b>
<b>Name</b>	Patient Profile Management
<b>Use Cases #</b>	
<b>Description</b>	This feature will allow the health team member to create new profiles for patients who want to join the clinic, modify profile, delete profile, and search for a patient profile. Patient profile will have the patient's info plus his or her goals and progress in the program. The patient has the option to create, modify and deactivate their profile.
<b>Rationale</b>	This is a basic capability of the system. It's one of the main reasons to replace the current paper-work method.
<b>Source</b>	Dr. Essam Jalal
<b>Fit Criteria</b>	<ol style="list-style-type: none"> <li>1. From the Patient Profile management page the user can do the following –               <ol style="list-style-type: none"> <li>a. Search for a patient using specific known information</li> <li>b. View a patient's profile.</li> <li>c. While viewing the patient's profile, the user can modify information stored.</li> <li>d. On the search page, the user can directly delete the patient profile without viewing it.</li> <li>e. Go to a screen that allows user to add a new patient.</li> <li>f. View a list of patients that have currently no goals in progress.</li> <li>g. Assign goals to a patient.</li> </ol> </li> </ol>
<b>Dependencies</b>	None
<b>Conflicts</b>	None
<b>Supporting Material</b>	Dr. Essam's document Meeting with Dr. Essam and Dr. Sajjad on 26 <sup>th</sup> February 2011
<b>History</b>	Dr. Essam proposed this capability in the report that he sent to Dr. Sajjad
<b>Priority</b>	3
<b>Risk</b>	5
<b>Effort</b>	5
<b>Approval</b>	Done

<b>Capability ID</b>	<b>2</b>
<b>Name</b>	Health Team Profile Management
<b>Use Cases #</b>	
<b>Description</b>	This capability allows a doctor to add, view, modify, and delete health team members and doctors from the system.
<b>Rationale</b>	This is a basic capability of the system. It's one of the main reasons to replace the current paper-work method.
<b>Source</b>	Dr. Essam Jalal, Dr. Sajjad, Project team
<b>Fit Criteria</b>	<p>An admin/health team member are allowed do the following -</p> <ol style="list-style-type: none"> <li>Search for a health team member using specific known information</li> <li>View an admin/health team member's profile.</li> <li>While viewing their own or health team member's profile, the admin can modify information stored.</li> <li>On the search page, the admin can directly delete a user's profile without viewing it.</li> <li>Go to a screen that allows user to add a new health team member.</li> <li>View a list of all health team members in the system.</li> </ol>
<b>Dependencies</b>	None
<b>Conflicts</b>	None
<b>Supporting Material</b>	Meeting with Dr. Essam and Dr. Sajjad on 26 <sup>th</sup> February 2011
<b>History</b>	<p>Date: Thursday, March 10, 2011  Version: 1.0  Author: Saeed Al-Tuwaileb</p> <p>Version: 1.1  Author: Shaeq Khan  This capability was proposed to Dr. Essam on our second meeting on 7<sup>th</sup> March 2011 and he approved the idea.</p>
<b>Priority</b>	2
<b>Risk</b>	3
<b>Effort</b>	2
<b>Approval</b>	Done

<b>Capability ID</b>	<b>3</b>
<b>Name</b>	Follow-up
<b>Use Cases #</b>	
<b>Description</b>	The system is expected to send a reminder to the health team and send a notification via email to the patient about a due follow up.
<b>Rationale</b>	Follow-up reminder is an important medium to make sure that the health team keeps a track of the patient's progress and the patient information remains up to date
<b>Source</b>	Dr. Essam Jalal
<b>Fit Criteria</b>	<p>After the patient is added to the system, they can add goal(s) for themselves or the health team set goal(s) for patient.</p> <ol style="list-style-type: none"> <li>After the patient's goal has been set, they can customize their goals to being weekly, fortnight, monthly where they will be required to do this goal for the specified period and then they will enter their scores to evaluate their own progress.</li> <li>Patients can be put into groups and then these groups can be assigned goals generally. These goals assigned can later be customized for patients individually.</li> <li>Each group of patient can have a set follow up date where they will be required to record their progress into the system.</li> <li>Patients that don't fall into any group can be assigned goals individually or they can select goals for themselves. They don't necessarily have to fall into certain groups.</li> <li>Patient accounts have to be approved before they are activated. This can be done from the health team's profile page.</li> </ol>
<b>Dependencies</b>	<p>This capability depends on:</p> <ul style="list-style-type: none"> <li>- Patient profile management: to get the patients data.</li> <li>- Goals management: to see whether the patient has chosen a goal or not .</li> </ul>
<b>Conflicts</b>	Development team: the development team is required to know how to deal web domain for sending mails.
<b>Supporting Material</b>	<p>Dr. Essam's document</p> <p>Meeting with Dr. Essam and Dr. Sajjad on 26<sup>th</sup> February 2011</p>

<b>History</b>	Dr. Essam proposed this capability in the report that he sent to Dr. Sajjad
<b>Priority</b>	2
<b>Risk</b>	3
<b>Effort</b>	4
<b>Approval</b>	Done

<b>Capability ID</b>	<b>4</b>
<b>Name</b>	Goals Management
<b>Use Cases #</b>	
<b>Description</b>	This is the most important feature in the System. The health team comes up with new goals after brainstorming sessions with patients. These are then added to the “Bank of Ideas” under specific categories determined by the health team. These goals can be customized according to individual patients by the health team and then assigned. The system will be able to relate these customized goals to patients assigned with them. The health team can remove goals from the “Bank of Ideas” too. The “Bank of Ideas” contains goals that are classified according to their nature [eg. Physical, Dietary etc.] upon their addition to the system.
<b>Rationale</b>	This database created to store goals makes it easier for doctors to view the basic ideas of weight loss opportunities, creates a more flexible and interactive system with respect to information storage.
<b>Source</b>	Idea developed by Dr. Essam Capture by project team during interview with Dr. Essam Idea enhanced by project team Meeting 1 [26 <sup>th</sup> February 2011] and 2 with Dr. Essam and Dr. Sajjad
<b>Fit Criteria</b>	<ol style="list-style-type: none"> <li>Brainstorming session/ Interactive session with patients to capture basic ideas and goals to promote weight loss</li> <li>The doctor/health team corrects and finalizes the goals captured</li> <li>These goals are then entered into the system by the user and referred to as the “Bank of Ideas”</li> <li>The user can also delete a goal from the “Bank of Ideas”</li> <li>The user can search goals based on certain parameters like most popular, most, successful, most failed etc.</li> <li>The patients choose a goal from the “Bank of Ideas” and customize it with approval from a member of the health team.</li> <li>A goal is added with attributes such as frequency, amount etc. according to the patient.</li> <li>This goal is then assigned to a patient and stored into the patient’s profile.</li> <li>In case the patient decides to discontinue temporarily, their name is added to a list of patients</li> </ol>

	with no current goals or if they choose to leave the program, their profile can be disabled which will disable further notifications for follow ups to the health team members.
<b>Dependencies</b>	Goal Suggestions
<b>Conflicts</b>	None
<b>Supporting Material</b>	Dr. Essam's document Meeting with Dr. Essam and Dr. Sajjad on 26 <sup>th</sup> February 2011
<b>History</b>	
<b>Priority</b>	5
<b>Risk</b>	4
<b>Effort</b>	5
<b>Approval</b>	Done

<b>Capability ID</b>	<b>5</b>
<b>Name</b>	Goals Suggestions
<b>Use Cases #</b>	none
<b>Description</b>	This feature helps the health team to find appropriate goals for a patient according to his health and personality traits. Also goals that are most popular, most achievable, most successful calculated using a simple algorithm will be showed by the system to assist the health team in making informed and intelligent decisions for individual patients.
<b>Rationale</b>	This feature is what our sponsor majorly looking for. Dr. Essam wants the system to ease the decision making process and generate detailed reports which will be addressed by this capability
<b>Source</b>	Project team
<b>Fit Criteria</b>	<ul style="list-style-type: none"> <li>a. If the health team member feels that the patient has not been up to in achieving his goals then he may ask the patient to repeat the goal with same or lesser frequency or ask the patient to choose a simpler goal.</li> <li>b. If the patient is successful, they will be encouraged to take their performance to the next step otherwise they can choose to take a different goal or the same one again.</li> <li>c. While the patient is being asked to choose a goal, it is difficult for the health team member to instantly come up with the best suggestion to the patient. So the system will provide an interface to the health team member to choose goal suggestions on basis of certain criteria's – <ul style="list-style-type: none"> <li>1. According to the patient's current health status and diseases associated with the patient.</li> <li>2. According to the patient's previous success with completing goals.</li> <li>3. According to the most popular goals amongst patients of the similar age/bmi.</li> <li>4. According to the most successful goals amongst patients of the similar age/bmi.</li> <li>5. According to patients personal choice.</li> </ul> </li> </ul>
<b>Dependencies</b>	Goals Management
<b>Conflicts</b>	None so far
<b>Supporting Material</b>	Interview number 2 with Dr. Essam [recording available]
<b>History</b>	None

<b>Priority</b>	4
<b>Risk</b>	4
<b>Effort</b>	5
<b>Approval</b>	Done

<b>Capability ID</b>	<b>6</b>
<b>Name</b>	Reports Management
<b>Use Cases #</b>	
<b>Description</b>	This capability allows the health team to generate and save records of patients, goals and the health team.
<b>Rationale</b>	To assess the progress of patients and health team members and the success of brainstorming sessions with patients for suggestions of goals.
<b>Source</b>	Dr. Essam Jalal Project Team
<b>Fit Criteria</b>	<p>The user will be able to generate reports as per their own convince based on current data in the system. The system supports generation of 3 kinds of reports –</p> <ul style="list-style-type: none"> <li>a. Patient Report - The health team can generate reports based on the following criteria's - <ul style="list-style-type: none"> <li>1. Success ratio of patients enrolled in clinic</li> <li>2. Dropout ratio</li> <li>3. Patients with high bmi.</li> <li>4. Patients with other disease [1,2,3,more]</li> <li>5. Patients more prone to drop out</li> <li>6. &lt;more report types to decided&gt;</li> </ul> </li> <li>b. Goal Report – The health team can generate reports based on the following criteria's - <ul style="list-style-type: none"> <li>1. Most popular</li> <li>2. Most successful</li> <li>3. Most failed</li> <li>4. Least assigned</li> <li>5. &lt;more report types to be decided&gt;</li> </ul> </li> <li>c. Health Team Report – the admin and health team can generate reports based on the following criteria's – <ul style="list-style-type: none"> <li>1. Success rate</li> <li>2. &lt;more report types to be decided&gt;</li> </ul> </li> </ul>
<b>Dependencies</b>	Patients Management, Health Team Profile Management, Goal Management
<b>Conflicts</b>	None.
<b>Supporting Material</b>	Dr. Essam's document Meeting with Dr. Essam and Dr. Sajjad on 26 <sup>th</sup> February 2011
<b>History</b>	None
<b>Priority</b>	3
<b>Risk</b>	4

<b>Approval</b>	Done

## 4. System stakeholders and users

### Stakeholders

*Organizations:* KFUPM, ARAMCO

*Individuals or groups:* Obesity Group Clinic of Aramco Hospital, Dr. Essam as project sponsor, iDhahran project team, Dr. Sajjad, Patients, College of Computer Sciences and Engineering at KFUPM

### Users

Dr. Essam, OGCT, Patients.

### 4.1 Market Demographics

With this project we want people to realize the importance of making informed decisions with the help of a computer system. Saudi Arabia is seeing obesity as a growing problem and not much is being done to solve it. A lot of people have taken surgical procedures as the only solution to weight loss. With this system we aim to provide patients with a successful and natural choice. As obesity increases, we predict a rise in similar support groups that will be started by hospitals in the Eastern Province and we aim to provide them with a tested and successful system.

This is the first time iDhahran develops a system of this kind. We vision the product to be component based so that code can be reused to develop similar systems in the future for other hospitals with obesity groups. This project gives us the satisfaction that we are making a difference in the lives of people by suggesting them with healthy habits and in a way enhancing their life span.

## 4.2 Stakeholder Summary

Name	Represents	Role
<b>Obesity Group Clinic [Aramco Hospital]</b>	Our primary customer	To provide us with their vision of the system and provide the project team with requirements and expectations of the system
<b>Dr. Essam as project sponsor</b>	Point of contact between the <i>OGC</i> and project team	Interviews and presentations are held with Dr. Essam and he provides a collective feedback to the project team
<b>Patients</b>	People who will majorly decide the success or failure of the system. The decreasing dropout rates are a measure of the success of the system. Second main users of the system.	Present some constraints such as making the system bi-lingual [English, Arabic] and will eventually be the people who are using by the system.
<b>iDhahran</b>	The development team for the <i>OGC</i> system	Gathering requirements, designing the system, implementation and deployment.
<b>Dr. Sajjad Mahmood as Supervisor</b>	To monitor and approve the development team's progress with the system	Providing feedback and improvements that can be made to the system

### 4.3 User Summary

Name	Description	Stakeholder
<b>OGCT members</b>	Primary end user of the system. Capable of adding new users to the system.	A part of the Obesity Group Clinic [Aramco Hospital]
<b>Patients</b>	Secondary end users of the system. Capable of adding goals and monitoring their progress.	Patientns.

### 4.4 User Environment

The users of the OGC System will be either the patients or the OGCT. System will be accessible from any platform with Internet connection. OGCT can follow-up upon patients' progress by getting emails reminders.

Currently the team uses Microsoft Excel to store patient information. They have also uploaded a set of goals onto the Aramco hospital website where patients can visit and view goals and select one.

## 4.5 Stakeholder Profiles

### 4.5.1 Obesity Group Clinic Team (OGCT)

<b>Representative</b>	Dr. Essam Jalal
<b>Description</b>	Our primary customer who will be using the system
<b>Type</b>	No experience with using a similar system. Most of them are technology competent but will need training to use the system efficiently.
<b>Responsibilities</b>	Appropriate usage of the system to benefit patients
<b>Success Criteria</b>	Increase in number of patients choosing to stay with the program over seeking surgical alternatives.
<b>Involvement</b>	Major source of requirements elicitation
<b>Deliverables</b>	Online tutorials and user manuals
<b>Comments / Issues</b>	

### 4.5.2 Dr. Essam

<b>Representative</b>	
<b>Description</b>	He is the point of contact between the project team and the <i>OGC</i>
<b>Type</b>	No experience with using a similar system. Technology competent but will need training to use the system efficiently.
<b>Responsibilities</b>	Will overlook the <i>OGCT</i> and deal with patients himself
<b>Success Criteria</b>	Increase in number of patients choosing to stay with the program over seeking surgical alternatives.
<b>Involvement</b>	Major source of information for requirements elicitation
<b>Deliverables</b>	The system itself, Online tutorials and user manuals
<b>Comments / Issues</b>	

#### 4.5.3 Patients

<b>Representative</b>	Dr. Essam Jalal
<b>Description</b>	Is our major stakeholder. Decides the future success or failure of the system. Second main users of the system.
<b>Type</b>	Has direct interaction with the system and is going to be affected by it
<b>Responsibilities</b>	Register to the system, modify goals and report back to OGCT.
<b>Success Criteria</b>	Increase in number of patients choosing to stay with the program over seeking surgical alternatives.
<b>Involvement</b>	Minor source of information for requirements elicitation
<b>Deliverables</b>	
<b>Comments / Issues</b>	

#### 4.5.4 iDhahran

<b>Representative</b>	The team leader
<b>Description</b>	Development team of the system
<b>Type</b>	Technical expertise in developing systems
<b>Responsibilities</b>	Gathering Requirements, Designing the system, Implementation and Deployment and documentation
<b>Success Criteria</b>	Satisfaction of users in terms of their usage of the system and increase in number of patients choosing to stay with the program over seeking surgical alternatives.
<b>Involvement</b>	The creators of the system, gathering Requirements, Designing the system, Implementation and Deployment
<b>Deliverables</b>	Ideas and requirements from the <i>OGCT</i>
<b>Comments / Issues</b>	

#### 4.5.5 Dr. Sajjad Mahmood

<b>Representative</b>	
<b>Description</b>	In charge of collecting documentation from the project team, making sure project is on time and consultant to the project for new ideas and better solutions
<b>Type</b>	Guru of technical and software systems development, the development team's mentor and guidance
<b>Responsibilities</b>	Provide feedback to group discussions and ideas
<b>Success Criteria</b>	Completion of the system and successful deployment
<b>Involvement</b>	In charge of collecting documentation from the project team, making sure project is on time and consultant to the project for new ideas and better solutions
<b>Deliverables</b>	Weekly deliverables [adjustable frequency] are delivered by the development team to record progress
<b>Comments / Issues</b>	

#### 4.5.6 College of Computer Sciences and Engineering, KFUPM

<b>Representative</b>	Dr. Sajjad Mahmood
<b>Description</b>	Is owner of the system to be developed
<b>Type</b>	Guru in technical aspects and have taken responsibility of completion of thousands of student projects to date.
<b>Responsibilities</b>	Supervising the overall project and to ensure the integrity of the entire team.
<b>Success Criteria</b>	Completion of the system and successful deployment
<b>Involvement</b>	Ensuring project manager has the system development on schedule
<b>Deliverables</b>	The final system

<b>Comments / Issues</b>	
--------------------------	--

## 4.6 User Profiles

This section describes each unique user of the system and their attributes in regards to the system. A through profile should cover the following topics for each type of user:

### 4.6.1 OGCT

<b>Representative</b>	
<b>Description</b>	A private individual that will use the system to profile patients and monitor their progress, as well as creating new <i>OGCT</i> member profiles.
<b>Type</b>	This is a casual user, possibly with previous use of similar patient's record system
<b>Responsibilities</b>	Adding patient's profiles, monitoring their progress and adding more goals to the BOI, as well as creating new OGCT member profiles.
<b>Success Criteria</b>	The success is completely defined by the customers continuing business with using our system.
<b>Involvement</b>	We will have sample customers to help evaluate our design.
<b>Deliverables</b>	
<b>Comments / Issues</b>	

#### 4.6.2 Patients

<b>Representative</b>	
<b>Description</b>	Private individuals that will use the system to register themselves and choose goals to be achieved.
<b>Type</b>	This is a casual user, possibly with no previous use of similar patient's record system
<b>Responsibilities</b>	Registration, managing goals and reporting back to OGCT.
<b>Success Criteria</b>	The success is completely defined by the customers continuing business with using our system.
<b>Involvement</b>	We will have sample customers to help evaluate our design.
<b>Deliverables</b>	
<b>Comments / Issues</b>	

#### 4.7 Key Stakeholder / User Needs

Need	Priority	Concerns	Current Solution	Proposed Solutions
<b>Secured access</b>	High	Management of private patients information	None	Manage user access with PIN numbers and encryption
<b>Scalable</b>	Moderate	None	None	Allow ample number of access channels for end users
<b>Profiling of patients</b>	High	Mixing patient's profiles	Paper forms	E-profiling of patients information
<b>Monitoring patient's progress</b>	High	Mixing patient's profiles	Paper forms	E-profiling of patients progress
<b>Easy to use</b>	High	Ability to provide complex operations with simple user interface	None	Provide user friendly, highly intuitive, help guided navigation in application
<b>Flexible</b>	High	Ability to provide a truly customized user experience	None	Provide a simple, yet robust, ability for the end user to customize the goals to match every patient's

				goals
<b>Instant</b>	Moderate to High	Ability to provide live feedback from the database	None	Use an appropriate tool to provide live feedbacks of the most recent activities

## **5. Project Plan**

### **5.1 Work Breakdown Structure**

#### **1.Initial Project Proposal**

- 1.1 Project Objective
- 1.2 The need of the project
- 1.3 Expected Output
- 1.4 Key Feature

#### **1.5 Project Impact**

- 1.5.1 Impact on Individual and Organization
- 1.5.2 Impact on Society

#### **2.Final Project Proposal**

#### **3. Management Plan**

##### **3.1 Overview**

##### **3.1.1 Project Summary**

- 3.1.1.1 Purpose, scope and objectives
- 3.1.1.2 Assumptions and Constraints
- 3.1.1.3 Project deliverables
- 3.1.1.4 Schedule and budget summary

##### **3.1.2 Evolution of the plan**

##### **3.2 References**

##### **3.3 definitions**

##### **3.4 Project Organization**

- 3.4.1 External Interface
- 3.4.2 Internal Interface
- 3.4.3 Roles And Responsibilities

##### **3.5 Managerial Process Plan**

##### **3.5.1 Start-up Plan**

- 3.5.1.1 Estimation Plan
- 3.5.1.3 Resource Acquisition Plan
- 3.5.1.4 Project Staff Training Plan

##### **3.5.2 Work Plan**

- 3.5.2.1 Work Activities

3.5.2.2 Schedule Allocation

3.5.2.3 Resource Allocation

### **3.5.3 Control Plan**

3.5.3.1 Requirements Control Plan

3.5.3.2 Schedule Control Plan

3.5.3.3 Budget Control Plan

3.5.3.4 Quality Control Plan

3.5.3.5 Reporting Plan

3.5.3.6 Metrics Collection Plan

### **3.5.4 Risk Management Plan**

3.5.4.1 Identifying Risks

3.5.4.2 Assessing Risks

3.5.4.3 Analyzing Risks

3.5.4.4 Monitoring Risks

3.5.4.5 Risk Management Roles and Responsibilities

3.5.4.6 Opportunities Management

3.5.5 Closeout Plan

## **3.6 Technical Process Plan**

3.6.1 Process Model

3.6.2 Methods, Tools, and Techniques

3.6.3 Infrastructure Plan

3.6.4 Product Acceptance Plan

## **3.7 Supporting Process Plan**

3.7.1 Configuration Management Plan

3.7.2 Verification and Validation Plan

3.7.3 Documentation Plan

3.7.4 Quality Assurance Plan

3.7.5 Reviews and Audits Plan

3.7.6 Problem resolution plan

3.7.7 Subcontractor management plans

3.7.8 Process improvement plan

3.8 SPMP Submission

4.Vision Document

## **5.SRS Document**

5.1 State Transition Diagrams & Use cases

5.2 Class & sequence diagrams

5.3 Screens Layout

5.4 Revised Project Plan

5.5 Revised Vision Document

5.6 Initial test cases

5.7 SRS

5.8 Requirement Review Report

5.9 Revised SRS

## **6. SDS Document**

6.1 Deployment Architecture

6.2 Package Diagram

6.3 Refined Class Diagram

6.5 DB design

6.6 White Box Test Cases

6.7 Software Design Document (SDD)

6.8 Design Review Report

6.9 Revised SDD

## **7. Prototype and Presentation**

## 5.2 Risk analysis and management

Risk Management Plan (RMP) will specify the process and the strategy of identifying, assessing, analyzing, and monitoring risks that can occur and affect the Obesity Group Clinic (OGC) system. The general process of risk management that will be followed in this project is specified as follows:

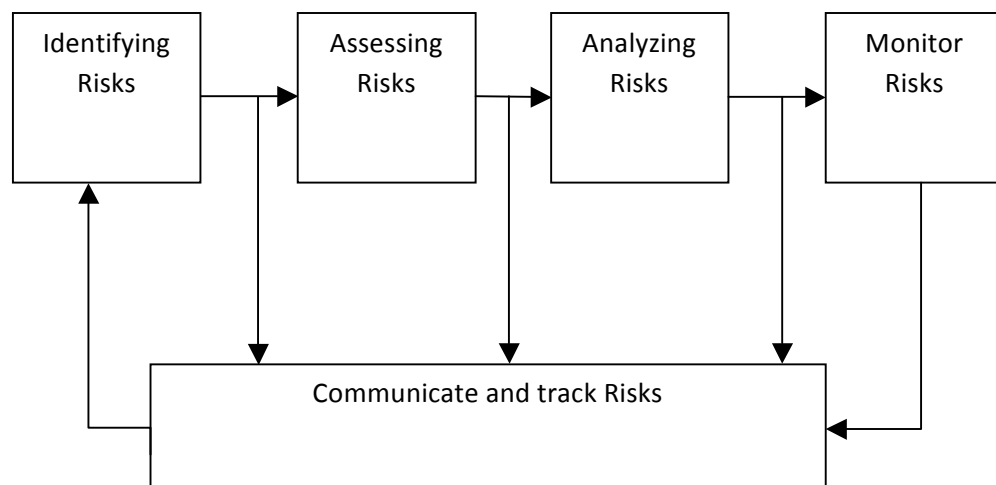

Figure 1: Risk Management Plan

### 5.2.1 Identifying Risks

Risks will be considered and identifies thoroughly until the completion of the Obesity Group Clinic (OGC) system. Any risk that is identified at any time of the project life cycle will be added to the (RMP). The following techniques will be followed to help in identifying risks that can affect the progress and the quality of the project:

- Inspecting the work breakdown structure (WBS) of the project to spot risks that may arise.
- Reviewing the risk management efforts of the previous similar system.
- Reviewing the design specifications and the agreement requirements.
- Brainstorming.

### 5.2.2 Assessing Risks

Each identified risk will be assessed and will be given the probability and the impact values so that all risks can be prioritized and handled based on the assigned values. Assessing criteria will be as follows:

- Probability:

High	The risk is more likely to occur.	> 75 %
Medium	The risk has about 50 % chances to occur or not.	25 to 75 %
Low	The risk is not likely to occur.	< 25 %

- Impact:

High	The risk may result in a complete failure for the system.
Medium	The risk may have a major impact that can effect schedule, quality...etc.
Low	The risk may have a minor impact on the project.

### 5.2.3 Analyzing Risks

The assessed risks will be analyzed thoroughly so that proper mitigation actions can be taken to reduce or eliminate the risks. Once the risks are analyzed, they will be categorized with their effects on the project.

### 5.2.4 Monitoring Risks

Continuous monitoring of the risks will be applied until the completion of the project. If there is any risk that has been identified, assessed and analyzed but not mitigated properly, then the risk must be reported as soon as possible to change the mitigation method. After that, (RMP) should be updated accordantly.

### 5.2.5 Risk Management Roles and Responsibilities

The team leader of the project will be responsible for the risk management plan of the project. However, the team leader can delegate the responsibility of (RMP) to any member of the team. The project manager or the responsible member will have the following tasks in order to manage the risks:

- Creating the (RMP).
- The participation in the identification of risks.
- Communicating and tracking risks process and tasks with other team members.

### 5.2.6 Opportunities Management

Similar to risks, the process is applied to identify, analyze and monitor opportunities that may occur. The opportunities may have a positive impact on the schedule, quality ... etc. so, here comes the role of opportunities management where the appropriate steps should be taken to maximize the benefits of the identified opportunity. The same procedure of risk management will be applied here and also with the same roles and responsibilities pointed out in the previous sections.

5.3 Project schedule and grant chart

## 6.2 Use case description

<b>Use Case Number</b>	UC01	
<b>Use Case Name</b>	Login	
<b>Author</b>	Saeed Al-Tuwaileb	
<b>Date of Creation</b>	07-April-11	
<b>Precondition(s)</b>	OGCT member or Admin have a valid username and password.	
<b>Successful Post Condition</b>	OGCT member or Admin will be logged-in into the system successfully.	
<b>Failed Post Condition</b>	OGCT member or Admin will not be able to login to the system.	
<b>Related Use Cases</b>	None.	
<b>Actors</b>	<ul style="list-style-type: none"> <li>OGCT member.</li> <li>Admin.</li> </ul>	
<b>Priority</b>	High	
<b>Trigger</b>	OGCT member or Admin want to access the system's functionalities when clicking on login.	
<b>Flow of Events</b>	<b>Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	User clicks login.
	2	OGCS prompts User to enter: <ul style="list-style-type: none"> <li>Username</li> <li>Password</li> <li>Account Type</li> </ul>
	3	User enters: <ul style="list-style-type: none"> <li>Username</li> <li>Password</li> <li>Account Type</li> </ul>

		And confirms the entered information.  A1: User forgot username or password.
	4	OGCS will allow User to login to the system successfully, and show the relevant main screen of User and use case ends.  A3: Invalid username or password.  E1: System is not accessible.
	<b>Alternate Flow A1: User forgot username or password.</b>	
	1	User initiates the process that he forgot the username or password.
	2	OGCS prompts User to enter his/her e-mail address that is stored in the User's profile and chooses to retrieve the required information.
	3	User enters his/her e-mail address.
	4	OGCS shows a message saying that username and password have been sent successfully.  A2: E-mail address does not exist.
	<b>Alternate Flow A2: E-mail address does not exist.</b>	
	1	OGCS shows a message saying that the entered e-mail address does not exist in the system.
	2	User confirms and the flow returns back to Alternate flow 1 step 2.
	<b>Alternate Flow A3: Invalid username or password</b>	
	1	OGCS shows a message saying that username or password is invalid

	2	The flow returns back to Basic flow step 2.
	<b>Error Flow E1: System is not accessible.</b>	
	1	System shows a message saying that the system is not accessible and use case ends.

<b>Use Case Number</b>	UC02	
<b>Use Case Name</b>	Add patient	
<b>Author</b>	Sameer Al-Amri & Abdulaziz Alamoudi	
<b>Date of Creation</b>	31-May-11	
<b>Precondition(s)</b>	No username should exist matching the entered username.	
<b>Successful Post Condition</b>	A username and password are created for the patient.	
<b>Failed Post Condition</b>	Username and password are not created for the patient.	
<b>Related Use Cases</b>	None.	
<b>Actors</b>	OGCT member.	
<b>Priority</b>	High	
<b>Trigger</b>	The profile creation UI for patients is displayed to the OGCT member.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCT member requests to create a profile for the patient.
	2	The OGCS prompts the OGCT member to enter the following: <ul style="list-style-type: none"> <li>• Patient's username.</li> <li>• Password.</li> </ul>
	3	OGCT member enters the required information and submits it.
	4	OGCS displays a confirmation message that the profile is created and the use case ends. <ul style="list-style-type: none"> <li>• A1: Username already exists in the</li> </ul>

		OGCS. • A2: Password not accepted.
	<b>Alternate Flow A1: Username already exists in the OGCS.</b>	
	1	OGCS displays a message saying that the account already exists.
	2	OGCT confirms and the flow goes back to step 3 of the main flow.
	<b>Alternate Flow A2: Password not accepted.</b>	
	1	OGCS displays a message that the password is not accepted.
	2	OGCT confirms the message and the flow goes back to step 3 of the main flow.
	<b>Error Flow E1: System failure.</b>	
	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC03	
<b>Use Case Name</b>	Delete Patient	
<b>Author</b>	Abdulaziz Alamoudi	
<b>Date of Creation</b>	31-May-11	
<b>Precondition(s)</b>	The patient should already exist in the OGCS.	
<b>Successful Post Condition</b>	The patient's profile and account is deleted from OGCS.	
<b>Failed Post Condition</b>	The patient's profile and account is not deleted from OGCS.	
<b>Related Use Cases</b>	UC05: Search Patient	
<b>Actors</b>	OGCT member	
<b>Priority</b>	High	
<b>Trigger</b>	The patient's profile is displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCT member will select a patient's profile and then deletes it. <ul style="list-style-type: none"> <li>A1: The OGCT member wants to search for a patient.</li> </ul>
	2	The OGCS will prompt the OGCT member to confirm the deletion process.
	3	The OGCT member will confirm the deletion. <ul style="list-style-type: none"> <li>A2: The OGCT member cancels the operation.</li> </ul>
	4	The OGCS will delete the patient and the use case ends. <ul style="list-style-type: none"> <li>E1: System Failure.</li> </ul>
	<b>Alternate Flow A1: The OGCT member wants to search for</b>	

	<b>a patient</b>	
	1	UC05 Search Patient is executed and the flow goes to step 1 of the main flow.
	<b>Alternate Flow A2: The OGCT member cancels the operation</b>	
	1	The OGCT member cancels the operation
	2	The OGCS cancels the operation and goes back to step 1 of the main flow.
	<b>Error Flow E1: System Failure</b>	
	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC04	
<b>Use Case Name</b>	Edit Patient	
<b>Author</b>	Abdulaziz Alamoudi	
<b>Date of Creation</b>	31-May-11	
<b>Precondition(s)</b>	The patient should already exist in the OGCS.	
<b>Successful Post Condition</b>	The patient's personal information is updated.	
<b>Failed Post Condition</b>	The patient's personal information is not updated.	
<b>Related Use Cases</b>	UC05: Search Patient.	
<b>Actors</b>	<ul style="list-style-type: none"> <li>• OGCT member</li> <li>• Patient</li> </ul>	
<b>Priority</b>	High	
<b>Trigger</b>	The patient's profile is displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	<p>The user (OGCT member or patient) will view the patient's profile and updates the required fields.</p> <ol style="list-style-type: none"> <li>1) First name.</li> <li>2) Last name.</li> <li>3) Date of birth.</li> <li>4) Gender.</li> <li>5) Address.</li> <li>6) Phone.</li> <li>7) Email.</li> <li>8) Weight.</li> <li>9) Height.</li> <li>10) BMI.</li> <li>11) Aramco ID.</li> </ol> <ul style="list-style-type: none"> <li>• A1: The user wants to search for a patient.</li> </ul>
	2	The OGCS will save the edited information

		and the use case ends.
		<ul style="list-style-type: none"> <li>• E1: System Failure</li> </ul>
	<b>Alternate Flow A1: The OGCT member wants to search for a patient</b>	
	1	UC05 Search Patient is executed and the flow goes to step 1 of the main flow.
	<b>Error Flow E1: System Failure</b>	
	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC05	
<b>Use Case Name</b>	Search Patient	
<b>Author</b>	Saeed Al-Tuwaileb & Abdulaziz Alamoudi	
<b>Date of Creation</b>	07-April-11	
<b>Precondition(s)</b>	OGCT member is logged-in the system.	
<b>Successful Post Condition</b>	OGCS shows the result of searching for a patient.	
<b>Failed Post Condition</b>	Search result will not be returned due to database error or patient does not exist.	
<b>Related Use Cases</b>	<ul style="list-style-type: none"> <li>• UC03. Delete Patient</li> <li>• UC04. Edit Patient</li> <li>• UC06. View Patient</li> </ul>	
<b>Actors</b>	OGCT member.	
<b>Priority</b>	High	
<b>Trigger</b>	OGCT member clicks search patient.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	OGCT member requests to search for a patient.
	2	OGCS prompts OGCT member to enter one or more of the following search criteria: <ul style="list-style-type: none"> <li>• First Name</li> <li>• Last Name</li> <li>• ARAMCO ID</li> </ul>
	3	OGCT member enters one or more search criteria: <ul style="list-style-type: none"> <li>• First Name</li> <li>• Last Name</li> <li>• ARAMCO ID</li> </ul>

		And confirms the search request.
	4	OGCS returns the search result based on the entered criteria and use case ends.  A1: No result returned.  E1: Database is not accessible.
	<b>Alternate Flow A1: No result returned</b>	
	1	OGCS shows a message saying that patient with the entered criteria does not exist.
	2	OGCT member confirms the message and the flow returns back to Basic flow step 2.
	<b>Error Flow E1: Database is not accessible.</b>	
	1	System shows a message saying that the database is not accessible and use case ends.

<b>Use Case Number</b>	UC06	
<b>Use Case Name</b>	View Patient	
<b>Author</b>	Abdulaziz Alamoudi	
<b>Date of Creation</b>	31-March-2011	
<b>Precondition(s)</b>	The patient should already exist in the OGCS.	
<b>Successful Post Condition</b>	The patient's profile is displayed.	
<b>Failed Post Condition</b>	The patient's profile is not displayed.	
<b>Related Use Cases</b>	UC05: Search Patient UC08: Assign Goal to Patient UC13: Generate Report for Patients	
<b>Actors</b>	<ul style="list-style-type: none"> <li>• OGCT member</li> <li>• Patient</li> </ul>	
<b>Priority</b>	High	
<b>Trigger</b>	None	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The user (OGCT member or patient) chooses to view the patient's profile that contains his personal information and work progress. <ul style="list-style-type: none"> <li>• A1: Search for a patient (if the user was an OGCT member).</li> </ul>
	2	The OGCS displays the patient's profile. <ul style="list-style-type: none"> <li>• E1: System failure.</li> </ul>
	3	The user might do the following: <ul style="list-style-type: none"> <li>• A2: Assign Goal to a patient.</li> <li>• A3: Generate report for a patient (if the user was an OGCT member)</li> </ul>

		The use case ends.
	<b>Alternate Flow A1: Search for a patient</b>	
	1	The OGCS executes UC05 Search Patient.
	<b>Alternate Flow A2: Assign Goal to a patient</b>	
	1	The OGCS executes UC08 Assign Goal to Patient.
	<b>Alternate Flow A3: Generate report for a patient</b>	
	1	The OGCS executes UC13 Generate Report for Patients.
	<b>Error Flow E1: System failure.</b>	
	1	The OGCS displays an error message.
	2	The user confirms and the use case ends.

<b>Use Case Number</b>	UC07	
<b>Use Case Name</b>	View patient with no goals.	
<b>Author</b>	Sameer Al-Amri & Abdulaziz Alamoudi	
<b>Date of Creation</b>	31-March-11	
<b>Precondition(s)</b>	<ul style="list-style-type: none"> <li>OGCT member successfully login into the OGCS.</li> <li>Patient already exists in OGCS.</li> </ul>	
<b>Successful Post Condition</b>	Patient(s) with no goals list are displayed to the OGCT member successfully.	
<b>Failed Post Condition</b>	The list of patients is not displayed	
<b>Related Use Cases</b>	None	
<b>Actors</b>	OGCT member	
<b>Priority</b>	Moderate	
<b>Trigger</b>	OGCT member chooses to “View Patients with no goals”	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCT member requests to view all the patients with no goals.
	2	OGCS displays a list of patients with no goals and use case ends. <ul style="list-style-type: none"> <li>A1: No such patient exists.</li> <li>E1: System failure</li> </ul>
	<b>Alternate Flow A1: No such patient exists</b>	
	1	OGCS displays a message saying that no such patient exists.
	2	OGCT member confirms and use case ends.
	<b>Error Flow E1: System failure.</b>	

	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC08	
<b>Use Case Name</b>	Assign Goal to Patient	
<b>Author</b>	Abdulaziz Alamoudi	
<b>Date of Creation</b>	1-May-11	
<b>Precondition(s)</b>	Both the patient and the goal should already exist.	
<b>Successful Post Condition</b>	A goal is assigned to a patient.	
<b>Failed Post Condition</b>	The goal is not assigned to a patient.	
<b>Related Use Cases</b>	<ul style="list-style-type: none"> <li>• UC06: View Patient</li> <li>• UC12: Search Goal</li> </ul>	
<b>Actors</b>	<ul style="list-style-type: none"> <li>• OGCT member</li> <li>• Patient</li> </ul>	
<b>Priority</b>	High	
<b>Trigger</b>	The patient's profile should be displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The user (OGCT member or patient) requests to assign a goal to patient. <ul style="list-style-type: none"> <li>• A1: Search Goal</li> </ul>
	2	The OGCS displays the list of goals. <ul style="list-style-type: none"> <li>• E1: System failure.</li> </ul>
	3	The user selects the goal, fills the required fields and confirms the goal assignment. <ul style="list-style-type: none"> <li>• A2: The user cancels the process.</li> </ul>
	4	The OGCS assigns the goal to the patient and the use case ends.
	<b>Alternate Flow A1: Search Goal</b>	
	1	OGCS executes UC 12 Search Goal.

	<b>Alternate Flow A2: The user cancels the process</b>	
	1	The user cancels the process.
	2	The OGCS displays the patient's profile and the use case ends.
	<b>Error Flow E1: System failure</b>	
	1	The OGCS displays an error message.
	2	The user confirms and the use case ends.

<b>Use Case Number</b>	UC09	
<b>Use Case Name</b>	Add Goal	
<b>Author</b>	Sameer Alamri	
<b>Date of Creation</b>	31-May-11	
<b>Precondition(s)</b>	<p>The goal shouldn't exist in the OGCS.</p> <p>The OGCT Member Successfully login.</p>	
<b>Successful Post Condition</b>	<p>-The goal is added to the OGCS and can be assigned to a patient.</p> <p>-The goal can be viewed and modified later.</p>	
<b>Failed Post Condition</b>	The goal is not added to OGCS.	
<b>Related Use Cases</b>	<p>UC08: Assign Goal to patient</p> <p>UC14: Generate Report for goal</p>	
<b>Actors</b>	OGCT member	
<b>Priority</b>	High	
<b>Trigger</b>	The list of goals is displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCT member is going to request to add a goal.
	2	<p>The OGCS asks OGCT member to select type of the goal.</p> <p>1. REINFORCEMENT</p> <p>2. PUNISHMENT</p>
	3	The OGCT member chooses the goal type.

	4	<p>The OGCS asks the OGCT Member to enter Goal information:</p> <p>Goal Name.</p> <p>Goal Description.</p> <p>Goal MaxPointScale</p> <p>Goal MinPointScale.</p>
	5	<p>The OGCT Member enters the information then proceeds.</p> <p>A1: The OGCT member resets the fields.</p> <p>A2: The OGCT member cancels the addition of the goal.</p>
	6	<p>The OGCS creates the goal and the use case ends.</p> <p>A3: Similar goal already exists.</p> <p>E1: System failure.</p>
	<b>Alternate Flow A1: The OGCT member resets the fields</b>	
	1	The OGCT member chooses to reset all fields.
	2	The OGCS empties all fields and the flow goes back to step 4 of the main flow.
	<b>Alternate Flow A2: The OGCT member cancels the addition of the goal</b>	
	1	The OGCT member chooses to cancel the addition of a goal.
	2	The addition process is cancelled and the use case ends.

	<b>Alternate Flow A3: Similar goal already exists</b>	
	1	The OGCS notifies the OGCT member that a similar goal already exists.
	2	The user chooses to search for this goal.
	3	The OGCS executes UC12 Search Goal and the use case ends.
	<b>Error Flow E1: System failure.</b>	
	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC10	
<b>Use Case Name</b>	Delete Goal	
<b>Author</b>	Sameer AlAmri.	
<b>Date of Creation</b>	1-June-11	
<b>Precondition(s)</b>	The goal should already exist in the OGCS.	
<b>Successful Post Condition</b>	The goal is deleted from OGCS.	
<b>Failed Post Condition</b>	The goal is not deleted from OGCS.	
<b>Related Use Cases</b>	UC12: Search Goal.	
<b>Actors</b>	OGCT member.	
<b>Priority</b>	High	
<b>Trigger</b>	A list of goal is displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCS will display a list of goals. A1: OGCT member searches for a goal.
	2	The OGCT member will delete the goal.
	3	The OGCS will display a confirmation message.
	4	The OGCT member will confirm the deletion. A2: The OGCT member cancels the operation.
	5	The OGCS will delete the goal and the use case ends. E1: System failure
	<b>Alternate Flow A1: OGCT member searches for a goal</b>	

	1	UC12 Search Goal is executed.
	<b>Alternate Flow A2: The OGCT member cancels the operation</b>	
	1	The OGCT member cancels the operation.
	2	The OGCS cancels the operation and goes back to step 1 of the main flow.
	<b>Error Flow E1: System failure.</b>	
	1	The OGCS displays an error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC11	
<b>Use Case Name</b>	Modify Goals	
<b>Author</b>	Sameer Alamri	
<b>Date of Creation</b>	1-June-11	
<b>Precondition(s)</b>	The goal that is going to be modified should exist in the OGCS.	
<b>Successful Post Condition</b>	The goal modification here doesn't necessarily indicate that the goal needs to be updated only. The goal modification might be done while assigning the goal to the patient but it won't change the original information.	
<b>Failed Post Condition</b>	Failure of goal modification process.	
<b>Related Use Cases</b>	UC12: Search Goal	
<b>Actors</b>	OGCT member	
<b>Priority</b>	High	
<b>Trigger</b>	The goals Description and scale are displayed.	
<b>Flow of Events</b>	<b>Basic Flow</b>	
	<b>Step Number</b>	<b>Steps</b>
	1	The OGCT member is going to select the goal that needs to be changed.  A1: The OGCT member wants to search for a goal.
	2	The system will display the goal's related information.  E1: System Failure.
	3	The OGCT member will change the information that he/she needs and confirms the changes.  Changes :

		Goal Scale.  Goal Description.
	4	The OGCS updates the modified fields and the use case ends.  A2: The MinPoint greater than MaxPoint
	<b>Alternate Flow A1: The OGCT member wants to search for a goal.</b>	
	1	UC12 Search Goal is executed.
	<b>Alternate Flow A2: The MinPoint greater than MaxPoint</b>	
	1	The OGCS displays a message saying that a MinPointScale is greater than MaxPointScale.
	2	The OGSC confirms the message and the flow returns back to basic flow step 3.
	<b>Error Flow E1: System Failure.</b>	
	1	The system displays error message.
	2	The OGCT member confirms and the use case ends.

<b>Use Case Number</b>	UC12	
<b>Use Case Name</b>	Search Goal	
<b>Author</b>	Sameer Alamri.	
<b>Date of Creation</b>	1-June-11	
<b>Precondition(s)</b>	None	
<b>Successful Post Condition</b>	The goals that fit the query are displayed.	
<b>Failed Post Condition</b>	No results were found.	
<b>Related Use Cases</b>	UC10: Delete Goal UC11: Modify Goal	
<b>Actors</b>	OGCT member	
<b>Priority</b>	High

## 12. Test cases

Test Case Title	Login Test Case
Test Case ID	TC01-1
Initial State	OGCT member state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	OGCT member has a valid username and password.
Use Case (if applicable)	UC01: Login
Test Input	OGCT member enters a valid username and password.
Expected Output	OGCT member page is displayed.
Priority	High.
Test Type	Functional.

Test Case Title	Login Test Case
Test Case ID	TC01-2
Initial State	Admin state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	Admin has a valid username and password.
Use Case (if applicable)	UC01: Login
Test Input	Admin enters a valid username and password.
Expected Output	Admin page is displayed.
Priority	High.
Test Type	Functional.

Test Case Title	Login Test Case
Test Case ID	TC01-3
Initial State	User state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	User has a valid username and password.
Use Case (if applicable)	UC01: Login
Test Input	User enters an invalid username or password.
Expected Output	A message that says that the username or password is invalid.
Priority	High.
Test Type	Functional.

Test Case Title	Login Test Case
Test Case ID	TC01-4
Initial State	User state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	User must enter his or her email that is stored in the profile.
Use Case (if applicable)	UC01: Login
Test Input	User clicks on forgot username or password.
Expected Output	OGCS prompts User to enter his or her email that is stored in the system.
Priority	Medium.
Test Type	Functional.

Test Case Title	Login Test Case
Test Case ID	TC01-5
Initial State	User state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	User must enter his or her email that is stored in the profile.
Use Case (if applicable)	UC01: Login
Test Input	User enters a valid email address.
Expected Output	OGCS sends an email to the entered email address with the login information.
Priority	Medium.
Test Type	Functional.

Test Case Title	Login Test Case
Test Case ID	TC01-6
Initial State	User state is logged out.
Author	Saeed Al-Tuwaileb
Pre-conditions (if applicable)	None.
Use Case (if applicable)	UC01: Login
Test Input	User enters an invalid email address.
Expected Output	OGCS shows a message saying that the entered email is not valid.
Priority	Medium.
Test Type	Functional.

Test Case Title	Add Patient Test Case
Test Case ID	TC02-1
Author	Abdulaziz Alamoudi
Initial State	The profile creation UI for patients is displayed to the OGCT member.
Pre-conditions (if applicable)	No username should exist matching the entered username.
Use Case (if applicable)	UC02 Add Patient
Test Input	Fill the following fields: <ul style="list-style-type: none"> <li>• Patient's username.</li> <li>• Password.</li> </ul>
Expected Output	A username and password are created for the patient.
Failure	Username and password are not created for the patient.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Patient Test Case
Test Case ID	TC02-2
Author	Abdulaziz Alamoudi
Initial State	The profile creation UI for patients is displayed to the OGCT member.
Pre-conditions (if applicable)	No username should exist matching the entered username.
Use Case (if applicable)	UC02 Add Patient
Test Input	<p>Fill the following fields:</p> <ul style="list-style-type: none"> <li>• Patient's username.</li> <li>• Password.</li> </ul> <p>But for an existing patient or incorrect input.</p>
Expected Output	Error message generated.
Failure	Input accepted and no error is generated.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Delete Patient Test Case
Test Case ID	TC03-1
Author	Abdulaziz Alamoudi
Initial State	The patient's profile is displayed.
Pre-conditions (if applicable)	The patient should already exist in the OGCS.
Use Case (if applicable)	UC03 Delete Patient
Test Input	Try to delete the patient.
Expected Output	The patient is deleted.
Failure	The patient is not deleted.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Delete Patient Test Case
Test Case ID	TC03-2
Author	Abdulaziz Alamoudi
Initial State	A list of patients should be displayed.
Pre-conditions (if applicable)	The patient should already exist in the OGCS.
Use Case (if applicable)	UC03 Delete Patient
Test Input	Cancel deletion process
Expected Output	The deletion process is canceled.
Failure	The deletion process is not canceled.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Edit Patient Test Case
Test Case ID	TC04-1
Author	Abdulaziz Alamoudi
Initial State	The patient's profile is displayed.
Pre-conditions (if applicable)	The patient should already exist in the OGCS.
Use Case (if applicable)	UC04 Edit Patient
Test Input	Personal information of the patient is updated.
Expected Output	The patient's personal information is updated.
Failure	The patient's profile is not updated.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Search Patient Test Case
Test Case ID	TC05-1
Author	Abdulaziz Alamoudi
Initial State	OGCT member clicks search patient.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC05 Search Patient
Test Input	OGCT member enters search criteria for a patient that exists in OGCS.
Expected Output	OGCS returns the search result to OGCT member with the patient profile that matches search criteria.
Failure	OGCS doesn't return the search result.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Search Patient Test Case
Test Case ID	TC05-2
Author	Abdulaziz Alamoudi
Initial State	OGCT member clicks search patient.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC05 Search Patient
Test Input	OGCT member enters search criteria for a patient that does not exist in OGCS.
Expected Output	OGCS shows a message saying that the patient with the entered search criteria does not exist.
Failure	OGCS doesn't return the search result.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	View Patient Test Case
Test Case ID	TC06-1
Author	Abdulaziz Alamoudi
Initial State	None
Pre-conditions (if applicable)	The patient should already exist in the OGCS.
Use Case (if applicable)	UC06 View Patient
Test Input	The OGCT member selects a patient's profile.
Expected Output	The patient's profile is displayed.
Failure	The patient's profile is not displayed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	View Patients with no Goal Test Case
Test Case ID	TC07-1
Author	Abdulaziz Alamoudi
Initial State	OGCT member chooses to “View Patients with no goals”
Pre-conditions (if applicable)	<ul style="list-style-type: none"> <li>OGCT member successfully login into the OGCS.</li> <li>Patient already exists in OGCS.</li> </ul>
Use Case (if applicable)	UC07 View Patients with no Goal
Test Input	OGCT member tries to view patents with no goals.
Expected Output	Patient(s) with no goals list are displayed to the OGCT member successfully. If no such patient exists then the OGCT member should notified.
Failure	The list of patients is not displayed
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Assign Goal to Patient Test Case
Test Case ID	TC08-1
Author	Abdulaziz Alamoudi
Initial State	The patient's profile should be displayed.
Pre-conditions (if applicable)	Both the patient and the goal should already exist.
Use Case (if applicable)	UC08 Assign Goal to Patient
Test Input	Select the goal and fill the required fields.
Expected Output	A goal is assigned to a patient.
Failure	No goal was assigned to the patient.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Assign Goal to Patient Test Case
Test Case ID	TC08-2
Author	Abdulaziz Alamoudi
Initial State	The patient's profile should be displayed.
Pre-conditions (if applicable)	Both the patient and the goal should already exist.
Use Case (if applicable)	UC08 Assign Goal to Patient
Test Input	Cancel assigning a goal to the patient.
Expected Output	Assigning goal is canceled.
Failure	The goal is assigned.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Goal Test Case
Test Case ID	TC09-1
Author	Sameer AlAmri
Initial State	The list of goals is displayed.
Pre-conditions (if applicable)	The new goal shouldn't exist in the OGCS.
Use Case (if applicable)	UC09 Add Goal
Test Input	<p>The OGCT member will enter the attributes of a goal:</p> <ul style="list-style-type: none"> <li>-Name of the goal.</li> <li>-description of the goal.</li> <li>-MaxPointScale</li> <li>-MinPointScale</li> </ul>
Expected Output	A new goal is created.
Failure	The goal is not added to OGCS.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Goal Test Case
Test Case ID	TC09-2
Author	Abdulaziz Alamoudi
Initial State	The list of goals is displayed.
Pre-conditions (if applicable)	The goal shouldn't exist in the OGCS.
Use Case (if applicable)	UC09 Add Goal
Test Input	Reset all fields.
Expected Output	All fields are cleared.
Failure	Fields are not cleared.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Goal Test Case
Test Case ID	TC09-3
Author	Abdulaziz Alamoudi
Initial State	The list of goals is displayed.
Pre-conditions (if applicable)	The goal shouldn't exist in the OGCS.
Use Case (if applicable)	UC09 Add Goal
Test Input	Cancel adding a goal.
Expected Output	Adding goal process is canceled.
Failure	Adding goal process is not canceled.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Goal Test Case
Test Case ID	TC09-4
Author	Abdulaziz Alamoudi
Initial State	The list of goals is displayed.
Pre-conditions (if applicable)	The goal shouldn't exist in the OGCS.
Use Case (if applicable)	UC09 Add Goal
Test Input	Add a goal that already exists in the OGCS.
Expected Output	The OGCS notifies the OGCT member that a similar goal exists.
Failure	The duplicated goal is added.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Delete Goal Test Case
Test Case ID	TC10-1
Author	Abdulaziz Alamoudi
Initial State	A list of goal is displayed.
Pre-conditions (if applicable)	The goal should already exist in the OGCS.
Use Case (if applicable)	UC10 Delete Goal
Test Input	The OGCT member deletes the goal.
Expected Output	The goal is deleted.
Failure	The goal is not deleted.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Delete Goal Test Case
Test Case ID	TC10-2
Author	Abdulaziz Alamoudi
Initial State	A list of goal is displayed.
Pre-conditions (if applicable)	The goal should already exist in the OGCS.
Use Case (if applicable)	UC10 Delete Goal
Test Input	The OGCT member cancels the deletion of the goal.
Expected Output	The deletion process is canceled.
Failure	The deletion is not canceled.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Modify Goals Test Case
Test Case ID	TC11-1
Author	Abdulaziz Alamoudi
Initial State	The goals attributes are displayed.
Pre-conditions (if applicable)	The goal that is going to be modified should exist in the OGCS.
Use Case (if applicable)	UC11 Modify Goals
Test Input	Certain attributes are modified.
Expected Output	Updating the original information of the goal.
Failure	Failure of goal modification process.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Modify Goals Test Case
Test Case ID	TC11-2
Author	Sameer AlAmri
Initial State	The goals attributes are displayed.
Pre-conditions (if applicable)	The goal that is going to be modified should exist in the OGCS.
Use Case (if applicable)	UC11 Modify Goals
Test Input	The OGCT member modifies the goal.
Expected Output	The OGCS updates the goal.
Failure	The original information does not change.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Search Goal Test Case
Test Case ID	TC12-1
Author	Sameer AlAmri
Initial State	The goal screen is displayed.
Pre-conditions (if applicable)	None
Use Case (if applicable)	UC12 Search Goal
Test Input	Search criteria.  -Keyword.  -Type.  -Checkbox (most popular, most successful and most failed
Expected Output	A filtered list of goals is displayed.
Failure	Wrong results are displayed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Search Goal Test Case
Test Case ID	TC12-2
Author	Abdulaziz Alamoudi
Initial State	The goal screen is displayed.
Pre-conditions (if applicable)	None
Use Case (if applicable)	UC12 Search Goal
Test Input	Search criteria for a goal that doesn't exist.  -Keyword.  -Type.  -Checkbox (most popular, most successful and most failed)
Expected Output	No results were found.
Failure	Wrong results are displayed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Generate Report For Patient Test Case
Test Case ID	TC13-001
Author	Sameer Al-Amri
Initial State	OGCT member page is displayed.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC13: Generate Report for Patient
Test Input	OGCT member: <ul style="list-style-type: none"> <li>• Selects report type.</li> <li>• Fills in report criteria.</li> <li>• Selects report period.</li> </ul> And clicks Generate.
Expected Output	OGCS displays Patient Reports page to OGCT member.
Failure	No Failure.
Priority	High.
Test Type	Functional.

Test Case Title	Generate Report For Patient Test Case
Test Case ID	TC13-002
Author	Sameer Al-Amri
Initial State	Patient Reports page is displayed.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC13: Generate Report for Patient
Test Input	OGCT member: <ul style="list-style-type: none"> <li>• Selects report type.</li> <li>• Fills in report criteria.</li> <li>• Selects report period.</li> </ul> And clicks Generate.
Expected Output	OGCS generates the report and views it to OGCT member.
Failure	The system does not generate the report.
Priority	High.
Test Type	Functional.

Test Case Title	Generate Report For Goal Test Case
Test Case ID	TC14-001
Author	Sameer Al-Amri
Initial State	OGCT member page is displayed.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC14: Generate Reports for Goals
Test Input	OGCT member clicks on Goals Reports.
Expected Output	OGCS displays Goals Reports page to OGCT member.
Failure	No Failure.
Priority	High.
Test Type	Functional.

Test Case Title	Generate Report For Goal Test Case
Test Case ID	TC14-002
Author	Sameer Al-Amri
Initial State	OGCT member page is displayed.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC14: Generate Reports for Goals
Test Input	OGCT member: <ul style="list-style-type: none"> <li>• Selects report type.</li> <li>• Fills in report criteria.</li> <li>• Selects report period.</li> </ul> And clicks Generate.
Expected Output	OGCS generates the report and views it to OGCT member.
Failure	No Failure.
Priority	High.
Test Type	Functional.

Test Case Title	Generate Report For Goal Test Case
Test Case ID	TC14-003
Author	Saeed Al-Tuwaileb
Initial State	The generated Goals Report is displayed to OGCT member.
Pre-conditions (if applicable)	OGCT member is logged-in the system.
Use Case (if applicable)	UC22: Generate Reports for Goals
Test Input	OGCT member clicks Save Report.
Expected Output	OGCS shows a message saying that the report has been saved successfully.
Failure	No Failure.
Priority	High.
Test Type	Functional.

Test Case Title	Add Team Member Test Case
Test Case ID	TC15-1
Author	Sameer Al-Amri
Initial State	Add Team Member form is displayed.
Pre-conditions (if applicable)	<ul style="list-style-type: none"> <li>OGCT Member (Admin) successfully login into the OGCS.</li> <li>The new OGCT member does not exist in the OGCS.</li> </ul>
Use Case (if applicable)	UC15: Add Team Member
Test Input	OGCT Member (Admin) tries to add a Team Member.
Expected Output	Team Member is added.
Failure	Team Member is not added.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Add Team Member Test Case
Test Case ID	TC15-2
Author	Sameer Al-Amri
Initial State	Add Team Member form is displayed.
Pre-conditions (if applicable)	<ul style="list-style-type: none"> <li>OGCT Member (Admin) successfully login into the OGCS.</li> <li>The new OGCT member does not exist in the OGCS.</li> </ul>
Use Case (if applicable)	UC15: Add Team Member
Test Input	Adding a Team Member that already exists.
Expected Output	A message is displayed saying that the Team Member already exists.
Failure	Team Member is added.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Delete Team Member Test Case
Test Case ID	TC16-1
Author	Sameer Al-Amri
Initial State	OGCT member leaves the OGC program.
Pre-conditions (if applicable)	<ul style="list-style-type: none"> <li>OGCT Member (Admin) successfully login into the OGCS.</li> <li>The OGCT member existing in the OGCS.</li> </ul>
Use Case (if applicable)	UC16 Delete Team Member
Test Input	The team member is deleted
Expected Output	The follow up is done by OGCT member.
Failure	OGCT member is deleted from the OGCS successfully.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Edit Team Member
Test Case ID	TC17-1
Author	Sameer Al-Amri
Initial State	Edit Team Member form is displayed.
Pre-conditions (if applicable)	<ul style="list-style-type: none"> <li>OGCT Member (Admin) successfully login into the OGCS.</li> </ul>
Use Case (if applicable)	UC17: Edit Team Member
Test Input	OGCT Member (Admin) tries to edit a Team Member.
Expected Output	Team Member profile is edited.
Failure	Team Member profile is not edited.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Search Team Member Test Case
Test Case ID	TC18-1
Author	Sameer Al-Amri
Initial State	OGCT member chooses search.
Pre-conditions (if applicable)	OGCT member is logged-in the OGCS successfully.
Use Case (if applicable)	UC18 Search Team Member
Test Input	<p>User enters OGCT member to enter one or more search criteria:</p> <ul style="list-style-type: none"> <li>• First Name</li> <li>• Last Name</li> <li>• ARAMCO ID</li> </ul>
Expected Output	OGCS shows the result of searching for OGCT member.
Failure	Team Member not found.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	View Team Member Test Case
Test Case ID	TC19-1
Author	Sameer Al-Amri
Initial State	OGCT member wants to see OGCT member information.
Pre-conditions (if applicable)	OGCT member successfully login into the OGCS.
Use Case (if applicable)	UC19 View Team Member
Test Input	The Admin chooses to view the team member.
Expected Output	OGCT member information is displayed.
Failure	OGCT member information is not displayed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Evaluate Patient Test Case
Test Case ID	TC20-1
Author	Abdulaziz Alamoudi
Initial State	The patient's progress table is displayed.
Pre-conditions (if applicable)	The patient's profile should already exist.
Use Case (if applicable)	UC20 Evaluate Patient
Test Input	Fill in the required fields with correct input.
Expected Output	The progress table is updated.
Failure	-Values are not accepted.  -Table is not updated.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Evaluate Patient Test Case
Test Case ID	TC20-2
Author	Abdulaziz Alamoudi
Initial State	The patient's progress table is displayed.
Pre-conditions (if applicable)	The patient's profile should already exist.
Use Case (if applicable)	UC20 Evaluate Patient
Test Input	Fill in the required fields with incorrect input.
Expected Output	The OGCS rejects the inputs and notifies the user.
Failure	-Values are accepted. -Table is updated.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Modify Assigned Goal Test Cases
Test Case ID	TC21
Author	Sameer Al-Amri
Initial State	OGCT member or patient wants to edit the goal assigned.
Pre-conditions (if applicable)	-OGCT member or patient successfully login into the OGCS. - No entry in the first slot of the goal assigned table.
Use Case (if applicable)	UC21 Modify Assigned Goal
Test Input	OGCT member or patient wants to edit the following:  -Frequency  -daily Max
Expected Output	Updated goal assigned table is displayed.
Failure	The original information is not changed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional

Test Case Title	Deleted Assigned Goal Test Cases
Test Case ID	TC22
Author	Sameer Al-Amri
Initial State	OGCT member or patient wants to delete the goal assigned.
Pre-conditions (if applicable)	-OGCT member or patient successfully login into the OGCS.
Use Case (if applicable)	UC22 Delete Assigned Goal
Test Input	OGCT member or patient selects the goal that he wants to delete then confirms.
Expected Output	Updated goal assigned table is displayed.
Failure	The original table is not changed.
Priority (High/Medium/Low)	High
Test Type (Functional, Performance, stress, etc.)	Functional
